

Module Two

Task: Drawing a simple face & inventing characters

Create a simple line drawing of a bear's face.

- Draw this bear six times
- Inside each face draw a different expression.
- Only use black and white.

Create a simple line drawing of a child's face and add hair.

- Draw this child six times
- Inside each face draw a different expression
- Only use black and white.

As you are putting on these expressions, look in the mirror and see what happens to your eyebrows, eyes, mouth, etc. Don't be surprised if your own expression changes as you're drawing your characters. Also, try to extend the mood to your character's hair and ears.

I am sure you will enjoy and appreciate how simple it is to create a character and a certain feeling just by using a few dots and lines.

Aim to invent as many characters as you can.
