

Module Three

Task: Forming your character and formatting your illustration

Apply all the directives of design and practiced tasks from this module when you sketch your character.

Follow my example character sketches and work within a frame to create and invent interesting compositions for your character within their story diorama.

Keep filling up your sketchbooks too and keep your greyscale handy. You will refer back to it a lot, believe me.

It's amazing how quickly your work can turn into a magical and powerful statement. Just by using these quite simple, informed, and fun techniques you can really transform your sketches and take them to the next level. A lot of it will become more instinctive and natural and I am sure you will learn a lot about basic design methods.

Enjoy!
