

## Module Four

# Handout: Introduction to using colour and materials

The fourth illustration module is an introduction to using colour and different materials and mediums.

These are the goals for this session:

- Discover the colour wheel and the foundations of colour
- Put together your own workbook or recipe book
- Mix your own colours
- Develop skills in various mediums
- Experiment with mixed media
- The wonder of watercolour
- Enjoy coloured pencils

Watch and follow my video demonstrations to help you along your colour and materials journey.

Colour, and falling in love with different mediums, is a magical and fulfilling journey in the illustrative process. You will find that mixing colours is so much more satisfying than working from ready made colours. And soon your eyes will start to see colours that others may not recognise. Your world will brighten. A blue sky or a green field will become a kaleidoscope of possibility.
