

Module Four

Illustration assignment: Using colour & materials

Choose a medium or mediums to work in. You might find that you have a favourite way of working already. Use a medium that you are comfortable to continue to use for the whole of your picture book. You can use any method or medium but be sure to use the same method and style for both Part A and Part B

Part A

Draw your character and add colour. Use a technique you have newly discovered. Don't forget all you have learned about contrast and expression and feeling in earlier modules.

Part B

Using colour again, create a sketch of a scene from your picture book story that includes your character.

It might be an unusual perspective or a close-up but be sure to work within a format (frame). Be sure to make a composition that leads the eye.

Remember, this is not finished art yet so relax and enjoy!
