

Module Four

Task: Create a colour wheel

Using the video as a guide, create a colour wheel. This colour wheel is a key colour tool. The colour wheel will show how to make shadows and what colours complement each other. It will help you to understand the importance of harmony and balance.

All colour has a feeling. The colour wheel will open up the world of colour vibration.

If you are using watercolour to make your colour wheel, remember to let each colour dry completely as you go along.
