

## Module Four

### Task: Simple form, line, colour, & mixed media

How do we make a simple illustration complete?

How can we transform simple line drawings into expressive and impressive pictures?

1. Take out your sketches of “a person with a dress” from Module 2 and your sheet of simple vases and vessels from Module 1. Using the techniques in this module, add colour.
2. Do a series of little wash swatches and, using an art pen, draw botanicals over the top.
3. Add collage for extra fun.
4. Fill your workbooks with secret recipes, techniques and ideas.

Don't underestimate the feeling and depth that colour will bring to your illustration. A mood can be made or demolished by using the right or wrong colour.

Ultimately whichever medium you choose as your favourite, it might be more than one, be sure to practice your techniques and find your own way of exploring and expressing yourself in a unique way.
